

Changes to functional impairment scoring proposed for 2024

CMS proposed changes to the number of points assigned to the OASIS items that drive reimbursement in the Patient-Driven Groupings Model (PDGM). See chart below for the proposed changes to the number of points that CMS will attach to these OASIS items in 2024. The numbers in parenthesis in the right column show the points that would be added or deleted to the corresponding OASIS items if finalized. (*See related story, p. 4*)
